

WHAT TO EXPECT DURING A ROOFING INSTALL

Congratulations on making the decision to upgrade your home with a new roof and thank you for allowing Renew Home Exteriors to complete the job. We take extreme pride in supplying Superior Products combined with Superior Service, We want you to be prepared for the process and want go over the process so you know what to expect,

FINAL MEASURE-We use satellite imagery to measure your roof before we even come out to quote it so we already know what material we will need. We will not need to come out and physically climb on the roof to get a final measure.

TIME TO SCHEDULE-When your job is next in line we will call you to schedule this time frame on average for a shingle roof is 14 to 21 business days, for a metal roof it is 6 to 8 weeks sometimes longer sometimes shorter. We will call you to schedule material and dumpster delivery and give you an anticipated start date "WEATHER PERMITTING" keep in mind we cannot tear off your roof if rain is in the forecast that day and possibly the next day if it will spill into 2 days. Also if we give you a start day but it rained the day before this may push back your day even if it's not raining the day we expected to start your job the reason is we would not have been able to finish the job before yours. Just remember if we have material on the ground your job is the next job in line. You do not need to take off work for a roof install.

DURING INSTALL-The installers will be tossing old roofing material off your roof. Before walking out of your house announce yourself loudly. Once the job is done they will do a full clean up of the job site and a magnetic sweep of the yard. The dumpster will be removed typically the next day.

FINAL INSPECTION-Our Project Manager will complete a final inspection of the completed job and collect any extra material as we always send extra material in case it's needed. If there is a final balance due he will also collect this at this time.
